## STATEMENT ON COVID-19

In keeping with the tenets of Pathway Rehabilitation Hospital's mission statement, we will continue to provide expert quality care during these trying times of the COVID-19 outbreak. The safety and welfare of our patients and employees will continue to be the top priority for our hospital.

We are constantly monitoring ways to avert the infiltration of this virus by following safety guidelines and administering preventative measures put forth by the CDC. We have educated employees and continue to update all of the Pathway staff on any new ideas that become available to slow or stop the spread of the virus. We aim to ensure that our employees receive first class training and supervision to deliver these services in a friendly and professional manner.

We hope you will avail yourself of the information available on COVID-19 by visiting [cdc.gov](https://www.cdc.gov). Please feel free to contact our office for the most current protocol at our hospital. Our goal is to continually strive to be the best, safest, and most reliable provider of these services to our patients and community.
